This flowchart is intended to help you understand the progression of courses in the Upper School.

You will notice there are three levels of most courses. This is designed so that teachers can vary the pace of instruction and level of direct instruction in order to appropriately challenge and support our students.

Each spring, students are carefully recommended by their current teacher. Moving up one level (e.g. from Advanced to Accelerated) is a possibility. Summer work and a successful placement test is required for students who appeal a teacher’s recommendation and wish to move up a level.
